## Who Is Avita?

Avita is a Weight Loss Clinic with a target audience of women age 40 to 55 on average. These are women struggling with weight gain and other symptoms of menopause which can not only affect their physical health but also their emotional health with low self-esteem and poor self image.

The Weight Loss Journey can be one that often feels impossible and frustrating. As women age and transition through peri-menopause and menopause, they may begin to experience unexplained weight gain. As another 10 lbs magically appears women become extremely frustrated and disheartened.
