Who Is Avita?

Avita is an Integrative Health Clinic with a target audience of women age 40 to 55 on average. These are women struggling with weight gain and multiple symptoms of menopause which can not only affect their physical health but also their emotional health with low self-esteem and poor self image.

The Menopause Journey can be one that often feels impossible and frustrating. As women age and transition through peri-menopause and menopause, they begin to experience overwhelming symptoms and lack of answers. Programs are best tailored with the guided experience of a certified Hormone Specialist and Women's Health Expert.
